

VAJRA

Public Records in Name Only.

Blocked by WAFs. Gated by CAPTCHAs.
Scattered across portals that refuse to talk.
AI makes it worse.

THE STANDARD FOR TRUTH

40 HOURS

FRAGMENTED CHAOS

Lawyers jump between 7 disconnected portals, copy-pasting into spreadsheets, hoping they didn't miss a hidden directorship three layers deep.

INDIAN REGISTRY DEPTH + PROVENANCE

RADICAL INTELLECTUAL HONESTY

ENTITY RESOLUTION IS A STUB

We cannot yet perfectly fuzzy-match "A. Raja" to "A Raja" across disparate government portals. Probabilistic matching is in development.

REGISTRY HOSTILITY

MCA21 and eCourts actively deploy WAFs and CAPTCHAs. Our ingestion pipelines occasionally fail; we report these failures transparently.

SCOPED TO INFRASTRUCTURE

We focus strictly on Phases 1–4 (Ingestion to Graph). We do not perform automated media aggregation or case-file assembly.

ROADMAP

PHASE 1: RESILIENCE

Scaling distributed proxy networks to counter registry-level blocking.

IN PROGRESS

PHASE 2: RESOLUTION

Implementing probabilistic entity resolution across multilingual datasets.

Q4 2026

PHASE 3: EXPANSION

Integrating secondary regulatory bodies and state-level archives.

Q1 2027
